

CDE90DE90%

DESCRIPTION:

CDE90% helps to prevent excessive degreasing of the scalp and hair by the primary active agent and in this respect exhibits a mild conditioning effect. CDE90% is one of the traditional ingredients used in the formulation of dishwashing liquid, shampoo, foam bath, soap, laundry liquid and liquid detergents. It is commonly used at the level of 3.0 – 5.0%.

Properties and uses:

CDE90% functions as a coactive agent to assist in the formulation of well-balanced finishing products in 4 ways:-

1. By improving the viscosity
2. By increasing the volume of foam produced
3. By improving the feel and texture of the foam
4. By stabilizing the foam

Technical specifications:

Active ingredient	89.5 ± 1.0%
Free Amine	5.0 ± 0.5%
Other Fatty Matter	1.5 ± 1.0%
Glycerine	3.8 ± 1.0%
Colour, APHA	>250
PH (1% solution) PH	9.0 ± 0.5
Amine to oil ratio	1 : 1

ORIGIN: Malaysia
